

Notice of Public Information Session Holland Avenue Reconstruction Scott Street to 40 meters South of Tyndall Street

The City of Ottawa has identified the need to replace the existing watermain on Holland Avenue from Scott Street to Tyndall Street. The watermain was originally installed between 1908 and 1922 and has reached the end of its service life.

Specifically, the work required includes:

- Replacement of the existing 152 mm diameter watermain in Holland Avenue from Scott Street to Tyndall Street, with a 406 mm diameter watermain including tie-ins at Scott Street, Spencer Street, Armstrong Street, Byron Avenue and Tyndall Street
- Replacement of existing water services to the property line for each property within the watermain reconstruction limits

- Two localized sewer repairs along Holland Avenue
- Trench reinstatement from Scott Street to Byron Avenue for the proposed watermain and services
- Replacement of sidewalks within the project limit
- Resurfacing of Holland Avenue from Scott Street to Tyndall Street
- The work is scheduled to proceed to construction in the summer of 2012 and to be complete by the fall of 2012.

During construction, the northbound (east side) lanes will need to be closed to accommodate the watermain construction work. One lane in each direction will be maintained for the duration of the work.

A Public Information Session to present the design is planned as follows:

Wednesday, May 16 2012, 4:30 to 7:30 p.m.

Fisher Park Community Centre / School, 250 Holland Avenue, Room 115, Ottawa, ON

At the Information Session, you will be able to review the proposed plans and related objectives, provide comments and bring forth any issues that have not yet been identified.
